## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/25/2008 has been entered.

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanner (U.S. 5,997,556).

Tanner discloses the claimed invention in figures 1-9, a sealing member (21,121) connected to a tubular member (11,22,110) and being configured to least surround the proximal end of the tubular member (21,121) which capable of preventing fluid leakage therethrough; wherein the sealing member (21,121) including a free end unconnected to the tubular member (11,22,110) forms of a

frustoconical profile; and a biasing member (151 and (col. 13, lines 6-10)) connected to the free end of the sealing member (21,121) for biasing the free end of the sealing member (21,121) away from the tubular member (11,22,110).

***Response to Arguments***

3. Applicant's arguments filed 02/25/2008 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.
